

2024 LATIN AMERICAN PRIZE FOR SHORT FILMS ABOUT WATER AND SCIENCE

Water is the essence of life, requiring our care and attention. Often, when science and local communities come together, we find new ways to solve water-related problems.

Do you have a story about water from your region? Could it help solve problems globally? Submit your short film to our competition for a chance to win prizes!

To learn more, visit <https://mayorsmakemovies.org/prize-page/> or scan the QR code.
